## ABOUT

Object-oriented on the .NET platform  
the principles of programming (OOP)  
using web applications  
i am passionate about development.

C#, ASP.NET Core, and Entity Framework  
With technologies such as working, modular and flexible  
i'm trying to create software.

Besides these, in our school  
Various languages such as C++,C,Java  
i also worked on projects on it.

To develop in the field of software  
and I am an open person to be guided. Apart from that, I am interested in music and sports. I really like to participate in international events.
